b. OIT, Commerce, has commented on the effects of State and military security classification hampering both the collection of information and dissemination. Further, that many requirements for information could be handled through them on an unclassified basis, using their normal facilities, and resulting in more thorough action at the collection point

25X1A

(This point will be amplified further in their survey.)

25X1A

c. CAB comments on similar security classification denying them information available from CIA and USAF, particularly on foreign air facilities.

Concurrent O/RE Action:

1. Preliminary survey reports being plotted, in worksheet form, to:

a. Identify components producing and requiring foreign economic intelligence, and for what purposes.

b. Specific mission, detailed functions, personnel qualifications, and T/O strength of such components.

c. Description of sources, nature and scope of the kinds of foreign economic data processed by such components.

d. Requirements of such components in terms of raw and processed foreign economic data for specified purposes.

e. Description, by categories and frequency of issue, of the various types of foreign economic studies and reports produced by such components.

f. Statement of "arrangements" currently in effect by each component.

g. Comments and recommendations pertaining to economic requirements and activities.

2. After plotting and analysis, the adequacy of such facilities and arrangements will be determined and means for their improvement will be reviewed and commented on by all submitting IAC and non-IAC agencies.

3. O/RE will then prepare for NSC consideration and action a comprehensive plan for satisfying the foreign economic intelligence requirements of the national security, and for a coordinated interagency effort to this end, based on a definite allocation of responsibilities among the agencies concerned; or by such other means as may be then indicated.
